## **Need Strategy? Use our Consulting and analyst services**

Infinity Turbine LLC is pleased to announce its consulting and analyst services. For decades I have worked in the renewable energy industry as a researcher, product developer, machine shop owner, and developing sales and markets, along with many inventions and innovations. I am a database expert, which gives you organized information and data.

XPrize Consulting is provided on a best efforts basis, and does not include any proprietary information developed from Infinity Turbine or our other owned companies.

We present data in logical, easy to understand format with links for additional research or verification of data.

Minimum contract \$4,999. Up to 10 hours of consulting. Sold as-is and provided on a best efforts basis.

All time is documented and a summary log will be provided when requested.

Unused credit may be used for a period of six months after invoice date.

Consulting is provided via telephone, email, or other media as agreed to in writing (email).

Minimum billing is 30 minutes, so it is recommended to have questions, support, and consulting for at least that period of time. References available.
